PROJECTS

Android-based PC Remote Control App
06/2023 - 11/2023 | Pandharpur
https://github.com/Abhijeetsurshetwar/Pc-Control-remote
An application enabling remote control of a PC using an Android device.

- Allows remote control of a PC from an Android device.
- Enables users to navigate and interact with their PC from a distance.
- A user-friendly interface facilitates tasks such as accessing files, launching applications, and controlling media playback.

Online Food Delivery Website
04/2023 - 01/2024 | Pandharpur
https://github.com/Abhijeetsurshetwar/Food-Delivery-Website
A food delivery website allows users to order meals from a variety of restaurants online for delivery to their location.

- We developed a dynamic and user-friendly food delivery website using modern web technologies. Designed to streamline the food ordering process, enhance the user experience, and optimise restaurant operation
- Designed and implemented an intuitive front-end interface using HTML, CSS, and JavaScript, ensuring a seamless and responsive user experience across devices

Portfolio Website
04/2024 - 05/2024 | Pune
https://github.com/Abhijeetsurshetwar/Portfolio-abhijeet
A website who describes about Yourself and your Skills.

- A well-maintained website showcasing my professional accomplishments, initiatives, and work that I have carefully chosen. The website features a visually beautiful and user-friendly layout that highlights my proficiency in HTML, CSS and JavaScript. This enables users to explore my expertise in technical domains.
